Integrated Telematics for Fleet Management

An interdisciplinary solution that enables fleet operation excellence with patented GPS accuracy, digitised vehicle and driver management focused on safety and operation using leading advance technology.

Using superior positioning accuracy, distance reporting and trip profiling we stand head and shoulder above traditional GPS tracking system. Complex built-in algorithms monitor GPS speed, orientation and time on a second-by-second basis and ensure that positioning relates to actual driving conditions.

At **iZeeM**, our purpose is to make it easy for customers to solve problems with IoT. With the help of our technology partner community we intend to develop and implement successful IoT projects that meets specific business needs.

About GEOTAB

Founded in North America in the year 2000, Geotab is a global leader in open platform fleet management for SMEs and MNCs. Its intuitive, full-featured solutions helps businesses manage their vehicles and drivers more efficiently by extracting accurate and actionable intelligence from real-time and historical data.

With over 14,000 customers worldwide, including Fortune 500 companies like Coca Cola, Pepsi, UPS, Telefonica, Daimler, BP and more, who rely on Geotab's technology to provide measurable management data. **iZeeM** is the first appointed authorised distributor based in Singapore for the Asian market.

About iZeeM

At **iZeeM**, we believe in bringing the best solutions for connected mobility to our customers by developing meaningful partnerships across the globe and applying their expertise to successfully implement comprehensive solutions in areas of fleet management, asset tracking, workforce management and safety & surveillance.

World's First Expandable Plug-&-Play Vehicle Telematics Platform

- **Geotab's GO7 device is a small yet extremely powerful telematics measurement tool.**

- **A truly plug-&-play technology: No need for dash-mounted antennas or any splicing of wires!**

- **Fitted into OBDII port & can be secured with a universal harness within minutes!**

Geotab GO7

Technical Specifications:

- ✓ I/O Expandability Support(IOX)
- ✓ Cellular Connectivity
- ✓ GPS Receiver
- ✓ Multiple Interfaces
- ✓ Accelerometer(3-axis auto-calibrating)
- ✓ Over The Air(OTA) Support
- ✓ Voltage Recording
- ✓ 32-MB Non-volatile Flash Memory
- ✓ In-cab Buzzer With Driver Feedback
- ✓ Patented curve-based Logging Algorithm
- ✓ Intelligent Ignition
- ✓ Standard Compliance

GEOTAB's 5 Core Solutions Pillars

Productivity Tracking
- Real-Time Second-by-Second Tracking
- Within 3m Accuracy
- Trips & Activity Reporting
- Congregation Reporting
- Route optimisation

Savings
- Reduce Fuel Costs
- Track Fuel Consumption
- Route optimisation
- Detect Engine Issues

Ease of Use
- Plug-and-Play Installation
- Mobile Device Management
- Instant Notifications

Driver Behaviour Management
- Risk & Safety Scorecards
- Performance Report Trending
- In-Vehicle Driver Coaching
- Ensure Seatbelt Utilisation
- Driver ID System

Software Integration
- MyGeotab: Web-hosted software
- Modern Coding: HTML5
- Software Development Kit (SDK)
- Integration with other Software Apps (HR, CRM, Accounting etc.)

DID YOU KNOW?

Data from telematics enabled vehicle tracking systems can raise a **fleet's productivity & vehicle utilisation** by **10-15%** & **15-20%** , **reduce fuel consumption** by **20-25%**, **idle time** by **20-30%**, **miles driven** by **5-10%** and **overtime** by **10-15%**.

Additionally, these GPS based systems put labour saving to 30 minutes per day, per driver. **Source: Geotab**

Why choose iZee**FLEET**?

+ *Operational Efficiency*
  Equip businesses with resources visibility and optimisation to enhance processes and fleet efficiencies

+ *Cost Management*
  Improve productivity, streamline operations and reduce waste can help to manage cost

+ *Safer Driving*
  Helps to improve driving behavior and keep vehicles well-maintained

+ *Expandability and Scalability*
  Ability to integrate with an intelligent suite of systems allows seamless flow of information across all business functions

What does **iZeeM** offer?

We access your current services, augment with suitable IoT solutions, to apply towards different verticals and operations. iZeeM offers:

Tailored IoT Solutions

Integrated suite of fleet management solutions with real-time tracking, monitoring and data processing abilities that meets industry specific needs, and enhances operational efficiency

Fleet Safety Consultation

Fleet risk consultancy, assessment and collaboration with risk management and safety expertise to provide safety monitoring platform, drive workplace safety, ensuring fleet safety

Training & Support

In-house and partners' expertise to train users on hardware installation and software application. Hosting, server, database support to ensure high level of customer satisfaction.
